 Custom Sizes Available:
 Widths: Up to 10' or 120", no seams
 Lengths: Up to 200'

TECHNICAL SPECIFICATIONS

Electrostatic Propensity (AATCC 134): Antistatic

FLAMMABILITY

Radiant Panel (ASTM E648): Class I
 Smoke Density (ASTM E662): Pass

LIMITED WARRANTY

Commercial/Residential Logo Warranty: 2 years on flat surfaces

**For a copy of the full warranty please ask for a warranty sheet*

MAINTENANCE

Regular vacuuming (Weekly in low-traffic areas, and daily or twice daily in areas with higher traffic) can remove up to 80% of surface dirt, and is the easiest way to prolong the life of your carpet.

Regular vacuuming is key to maintaining your carpet, but eventually the carpet color dulls from dirt and grime stuck in the fibers. The dirt is then carried further into the building to form more soil reservoirs. Additionally, the oil content (15%) of the soil causes particles to stick to carpet fiber and resist vacuuming. To restore the carpet to its best condition, frequent light cleaning gives the best result and is often very cost effective.

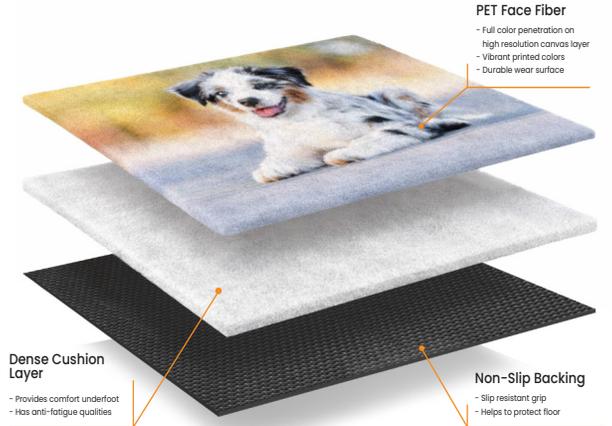

IMPORTANT NOTICE

Color Precision & Proof Disclaimer

Our Spectra Print HD systems are ICC Color-Managed for consistent results. Because monitors display color with light and fabric absorbs pigment, slight color variations between proofs and final prints are normal. Very fine details may appear softer or fill in during production and are not guaranteed to reproduce exactly.

Finished mats are produced within industry standards, allowing a +/- 3% size variance. Claims related to color differences, dimensional variations within this tolerance, or approved proofs will not be accepted.

All items are custom-made. Once production begins, orders cannot be canceled, returned, or refunded.

MAT FINISHING OPTIONS

Surged Border - rounded corners only

ADA compliant medium profile edging
